

Tingimused loovuse avaldamiseks Eesti koolis: Opetajate ja õpilaste uskumused loovuse ja loova koolikliima kohta

Conditions for creativity in Estonian school: Teachers' and Students' beliefs about creativity and creative school climate

Stanislav Nemeržitski, 26. august 2021

1

Millest selline teema?

Uurimuse taga olevad faktorid

- Loovuse tähtsus?
 - RÕK
 - Mõõdetav = ainuoluline?
 - Loovus kui 21. sajandis oskus?
- Eesti ja vene õppekeelega koolid
- Mida noored arvavad?

2

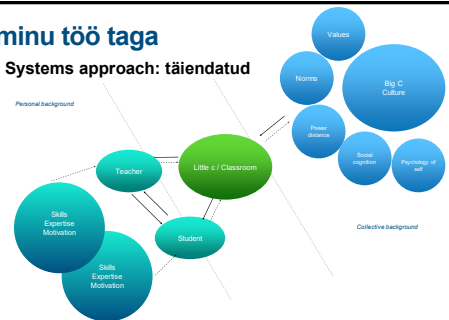

Peamised uurimuse eesmärgid

- Kuidas õpilased loovust defineerivad
- Individuaalsed ja koolikliima faktorid, mis loovust soodustavad
 - Õpilaste ja õpetajate nägemus
- Raamistik edasiste uurimuste suunamiseks

3

Teoria minu töö taga

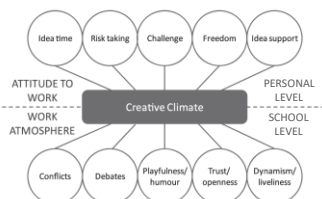

Hennessey's Systems approach: täiendatud

4

Teoria minu töö taga

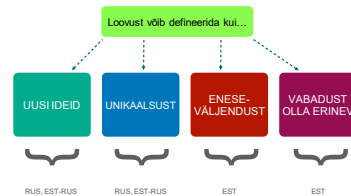

Ekvall loovkliima faktorid

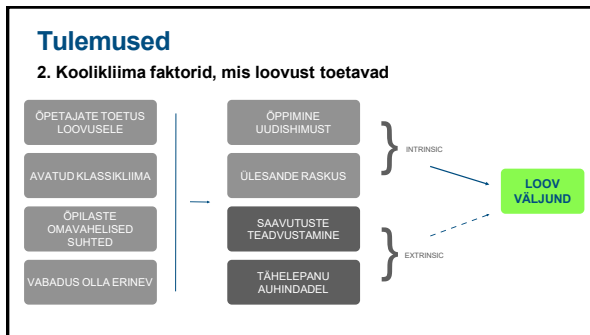

5

Tulemused

1. Õpilaste nägemus loovusest

6

7

Results

Table 2 Regression Analysis of School Climate Factors Predicting Students' Motivational Orientation, Estonian sample

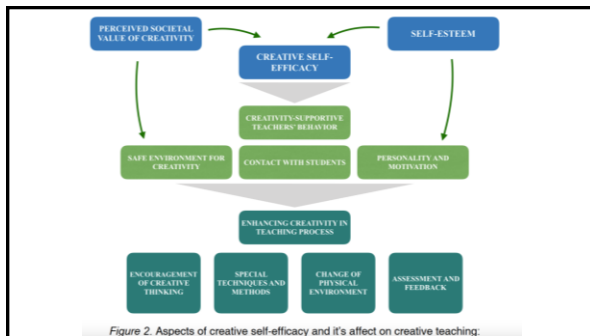

School Climate Factors	Intrinsic Learning Curiosity	Extrinsic Acknowledgment of achievement	Extrinsic Focus on reward
Teacher Support for Creativity	.01	.08**	.01
Open Classroom Climate	.02	.08**	.08**
Students' Beliefs	.02	.08***	.07
Freedom to be Different	.07***	.08***	.08***
Background information Grade 11, Male, 2 Female	.01***	-.01	.01
Age	.02	-.02	.02***
Observation coefficient R ²	0.48***	0.32***	0.24**

Table 3 Regression Analysis of School Climate Factors Predicting Students' Motivational Orientation, Russian Sample

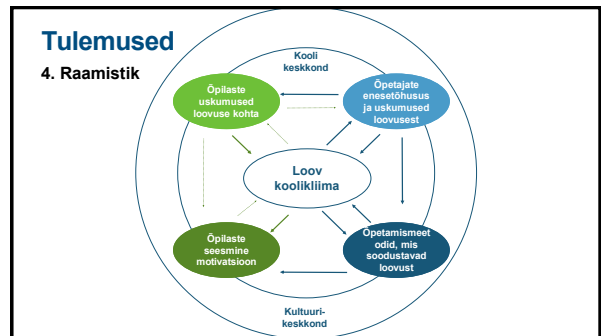

School Climate Factors	Intrinsic Learning Curiosity	Extrinsic Acknowledgment of achievement	Extrinsic Focus on reward
Teacher Support for Creativity	.01	.08**	.01
Open Classroom Climate	.02	.08**	.08**
Students' Beliefs	.02	.08***	.07
Freedom to be Different	.07***	.08***	.08***
Background information Grade 11, Male, 2 Female	.01***	-.01	.01
Age	.02	-.02	.02***
Observation coefficient R ²	0.48***	0.32***	0.24**
